

ACM BOARD

Each board has a self adhesive vinyl mounted on to the surface of the aluminium composite material (ACM) and can be supplied with various fixings, frames or posts. Aluminium composite has a polyethylene core that provides the majority of strength. Two aluminium sheets are bonded to this to provide the finished surface that we mount the printed graphic to.

FEATURES & BENEFITS:

- Graphic is printed on high quality gloss self adhesive vinyl as standard
- Construction provides excellent strength and stability
- Suitable for external shop signage, wayfinding or permanent solutions
- Can be single or double sided, however most use only one side
- ACM makes for relatively heavy duty signage

We can supply the post and panel kits for you to install or we can organise the process for you. Kits contain posts, brackets and a graphic board with bonded sign channel on the reverse.

HARDWARE SPECIFICATIONS:

Maximum Dimensions (mm):

The maximum dimensions for a single piece of mounted ACM board is 3050 (h) x 1500 (w) approximately 10ft x 5ft. If you require a sign larger than this, we are able to assemble multiple boards to create one piece of artwork

Material Thickness (mm):

3

GRAPHICS SPECIFICATIONS:

Artwork Requirements:

Please add 10mm of bleed on all artwork

Substrate:

Printed on gloss self-adhesive 3 year vinyl.
Can be laminated for durability.

ADDITIONAL:

Installation:

We offer full installation if required
